

TX 1813

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

DATE: JAN 24 1984

SUBJECT: Inactive Hazardous Waste Disposal at Federal Facilities

FROM: Jim Highland
Federal Facilities Compliance Coordinator (6ES-FA)

TO: Sam Nott
Chief, Superfund Branch (6AW-S)

Attached for your information and records are two additional reports on IRP investigations at Federal installations in Region 6. The reports are:

1. A Phase II report for ~~McGregor Naval Weapons Industrial Reserve Plant~~ at McGregor, Texas, and; 729170024708
2. a single volume containing Phase I reports on Fort Sam Houston, Camp Bullis and Canyon Lake Recreation Area, three associated Army installations in and near San Antonio, Texas.

These are more of the forthcoming reports I referred to in my January 3, 1984, memo to you on the same subject. Please refer to that memo regarding any review comments or follow-up recommendations. The General Accounting Office is currently conducting an investigation into coordination of the IRP between DOD and EPA, and have requested that we expedite our review and return of comments on the McGregor facility to the appropriate Navy office. I will send a copy of the review comments to the GAO. Response on the reports for the three Army installations is not quite so urgent.
